

Marcelle Yanari Yamaguti

Senior Frontend & Mobile Developer

São Paulo, Brazil · yanarimy@gmail.com · linkedin.com/in/yanari · github.com/yanari · portfolio-yanari.vercel.app

SUMMARY

Senior Frontend & Mobile Developer with 6+ years of experience building web and mobile products with React, TypeScript, Next.js, React Native and Flutter. Shipped products for retail, fintech, streaming, telecom and legal AI — from interface architecture and reusable components to API integration and cloud services on GCP.

EXPERIENCE

Full Stack Engineer — Análise Editorial

Jan 2026 – Present

São Paulo, Brazil

- Develop and maintain full-stack applications with Laravel, PHP and PostgreSQL, focused on data-intensive features.
- Build internal reporting systems with dynamic filters and data-driven interfaces tailored to business requirements.
- Design and optimize complex SQL queries for reporting, data retrieval, filtering and internal workflows.
- Enhance internal sales and intranet systems with new features, workflows and integrations, using AI-assisted development workflows.

Senior Frontend Developer — Lopti

May 2025 – Sep 2025

San Francisco, CA

- Built core screens and reusable UI components of a legal AI platform with React, Redux and TypeScript.
- Implemented real-time communication for the AI chat using WebSockets.
- Worked closely with the AI team on the frontend experience around legal documents and AI responses.
- Contributed to frontend architecture, development standards and code reviews.

Application Development Senior Consultant — Accenture

Feb 2022 – Oct 2024

- Led Google Analytics 4 and Salesforce integrations in the React Native and Flutter apps of RaiaDrogasil (RD) — the channel behind 75% of its digital interactions and 17% of its sales.
- Built the frontend of AutoMarket, a vehicle marketplace and financing platform for a major Mexican bank, with React and Redux from Figma designs, in a Spanish-speaking team.
- Co-designed and implemented a GCP data monetization platform for TIM Brasil (Cloud Run, Pub/Sub, Cloud Functions, BigQuery, Python, Flask) over behavioral data from 62M+ customers.
- Migrated a legacy system to Node.js with cron jobs and GCP services (Pub/Sub, Cloud Scheduler, Cloud Functions).

Software Developer — MultTV

Sep 2021 – Feb 2022

São Paulo, Brazil

- Led development of MultTV Plus, a white-label Flutter streaming app for iOS, Android and set-top boxes, working directly with the CEO.
- Shipped to the App Store and Google Play: 5,000+ Google Play downloads, 70+ live TV channels and 3,000+ on-demand titles.
- Applied TDD and automated CI/CD with GitHub Actions for multi-platform releases.

Frontend Developer — wepulse

Oct 2019 – Mar 2020

São Paulo, Brazil

- Built a responsive health services platform with React, Redux, Styled Components and SASS.
- Created reusable UI components and integrated REST APIs with the backend team.
- Improved load times with code-splitting and lazy loading.

Frontend Developer — Análise Editorial

Mar 2019 – Sep 2019

São Paulo, Brazil

- Built the company website from scratch with React, Redux and CSS Modules, mobile-first.
- Created custom animated components (mobile menu, carousel) with React Spring.
- Integrated the website with a CRM developed in parallel, via REST APIs.
